SUMMARY

Motivated 3rd-year Web Developer transitioning foundational academic and project experience into a professional setting. Dedicated to best practices in code quality and collaboration. Eager to contribute immediately to a challenging development team.

PROJECTS

Travora: Full-Stack Accommodation Listing Platform *Link*

Designed and deployed a full-stack platform enabling users to list and discover hotels and hostels. Implemented a responsive UI with HTML,CSS,JS and managed data persistence via MongoDB. With proper authentication and security. Demonstrates proficiency in end-to-end development and production readiness.
front-end : HTML,CSS,JS
backend : Node.js
Database : MongoDB
Deployed using Render

Ping : A Full-Stack Messaging Platform

Currently working on a good project which is based on MERN.
A full stack messaging app with great UI and great functionality.
